10/18/70

Dear Howard,

Thanks for note of 10/15 and Nichols papers, which I'll read with care as soon as possible.

Such things can be sent as "educational material-special fourth class rate", at 12¢ for the first pount, 6¢ for each additional pound, without enclosed first-class mail. First class can be enclosed upon payment of the extra six cents, and must be indicated on the envelope, "letter enclosed". It saves money, but does take a little extra time. Where there is no rush, the saving is justified. In this case it would have been 36¢.

What is new on spectro is enclosed.

In my opinion, Bud's ego-tripping and neglect are becoming clearer daily. I try to cope with it as best I can. It presents a great hazard and he blew a beautiful thing I had all prepared, for no reason whatsoever.

Nothing further on PH matter.

Thanks,
